PERSONAL PROJECTS

Online Voting Application (10/2021 - Present)

- This is **Online Voting web app** which have 2 login module for **Admin** and **Voter**. Admin module provides various features like adding, updating, view or delete an elected candidate data. While Voter module allow voter to login with valid username and password and cast their vote to candidate elected from their city.
- Inspiring from the situation arises in Pandemic like Corona.
- **Technology Used :-** I used **HTML, CSS, JAVASCRIPT** in frontend. **JAVA (JDBC , JSP , Servlet)** in backend and **ORACLE** as RDBMS. I also use **SWAL** library and **BOOTSTRAP** for making my project more real.
- **IDE :-** NetBeans.
